

## PLT 75

Launches an orange rubber ball that pulls a 5mm bright yellow floating line of 120 meters. The ball can land on deck and it is filled with a liquid in order to avoid bouncing and freezing.

The PLT 75 increases your safety zone for your equipment and personnel. It is commonly used in mooring, vessel to vessel and general line transfer operations.

Typical shooting range with a dry and clean line of 5mm is 90 meters.

The PLT Launching Unit is a multipurpose tool, meaning that you can add features according to your requirements. For your convenience we have put together the most commonly used setups.
