SOLO 365 ELECTRONIC SMOKE DETECTOR TESTER

SOLO365

Solo 365, the latest innovation in Solo's detector tester line, uses non-hazardous, non-pressurized, environmentally-friendly cartridge technology for smoke generation.

Solo 365 allows for faster testing and creates less smoke waste with an auto-start proximity sensor that automatically generates smoke when the detector enters the cup. Its unique clearing mode all but eliminates repeat alarms by clearing remaining smoke.

Testifire is the world's leading multicriteria detector tester. The all-in-one Testifire allows for faster and more efficient testing of both single and multi-sensor detectors.

Choose Testifire 1001 for testing heat and smoke or Testifire 2001 to test heat, smoke, and CO.

Testifire can deliver each stimulus individually or all three stimuli simultaneously, increasing productivity and lowering the overall testing time by up to 66%. A built-in clearing cycle provides rapid detector reset with no repeat alarms.

DETECTOR SENSITIVITY TESTING

trutest™
DETECTOR SENSITIVITY TESTER

TRUTEST SMOKE DETECTOR SENSITIVITY TESTER

TT801

Over time, smoke detector sensitivity can drift, becoming more or less sensitive. This fluctuation in sensitivity can cause the alarm to function ineffectively. Using detector testers to check the sensitivity of fire alarms is not only required by law but also provides greater control over the sensitivity of the fire alarms you're inspecting.

Trutest combines functional and sensitivity testing in one convenient package. With only one test, Trutest reads the precise detector sensitivity, indicating whether the detector needs to be recalibrated or replaced.
