

Notice

Subject: Workvests

Dear Customer,

We have made a slight change to our workvest product codes.

From now on, all WVO-50 workvests (WVO-50 and WVO-50s) will automatically come with a slot in the back. The WVO-100's will not be effected and will still not be offered in a slotted version.

This should make it much easier to stock our workvests in that any customers who want the regular WVO-50 will still the get WVO-50 but it will come with a slot in back. Slotted vest customers will not be affected except they will no longer have to add the "s" suffix to their workvest order.

Everything will be priced at the WVO-50 price.

Thank you for your business.

Best Regards,

Billy Pugh Co.
